Teacher professional development is the main theme of this paper Collaboration, teaching –learning facilitation, and effectiveness of professional development included second parts of paper shows some difficulties and challenges and possible situation for problem of in modern era.

Keyword : *Teacher professional development.*

INTRODUCTION

One of the basic in education is that quality of education depends largely open the quality of teacher whether the teacher is a person or whether the teacher programmed textbook unlikely that the students will get a superior education unless the teacher is superior. Enlightened emancipated and empowered teachers lead communities and nation to wands better and higher quality of life .They reveal clear rate the secretes of affainding higher value in life and nation empathy for the follow beings. They not only disseminate knowledge but also create new general knowledge .They are responsible for acculturating the role of education. The help of students in the education expansion universaliation of elementary education renationalization of secondary education higher and professional education are major challenges before the country.

II. ESSENTIAL ATTRIBUTES OF A TEACHER

Attributes means quality for those who are moral the fate of nation depend upon the skilled teacher .The skill in teacher is desirable for the fate of nation. Patience and tolerance is a laudable quality in all human beings but a teacher .There are two vital factors with which teachers are principally concerned in their profession.

1. Knowledge
2. The Child

Teacher must have the knowledge of the nature which has folded from knowledge is power for teacher A sound understanding of subject they will be called upon to teach in classroom . A teacher must keep pace with the changing accruing.

III. CHALLENGES FACED BY TEACHER IN MODERN ERA

- Lack of patient and increase rudeness short temper is to be addressed in formative years and reflection of value of society goes beyond classrooms.
- With the advent of Massive online open course teacher cannot be expected to be figure of knowledge.
- The importance of arts, VIZ Drama, music, and art literature, sociology, Dance is not recognized and even here it is battle ground prompted by media.
- The learning of recent era is student centric but here is need distinguish between questioning and relevant answers.
- Consumerists mind took students as product stakes which is consider it useless wealth of nation.
- There is seeming imbalance in technology evolution in of value systems. It would be unexpectable mutation in this process of learning.

IV.SAME POSSIBLE SOLUTION FOR CHALLENGES AND PROFESSIONAL DEVELOPMENT

- Teacher should have patient and resistant power for profession.
- Teacher should have griped and command on his subject area.
- Teacher should have fluent speaker takes variation in his voice and postures.
- Teacher must have to update with innovation in research and study field.
- Teacher should adopt positive instincts and always looks cheerful and energetic.
